

INSTRUCTIONS

1. Print off tag on either regular paper or card stock.

You can add trim marks in advance setting in most pdf or printer viewers.

2. Cut out the tag using a ruler and knife. (You can use scissors but it's just trickier to get a straight line.)

3. You can glue the tag onto a door hanger, use a loop of ribbon, lightweight magnets (if your door is metal), or just good ole tape to put it on your door.

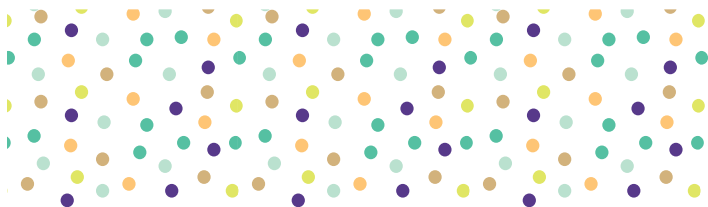

4. Enjoy! And feel free to use them as long as you like. (No one needs to know your 'baby' is 22 and away at college.)
